Xpro S-E LED

LED Exposure Unit

Max Plate Size: 63.5x76.2 cm / 25x30 in

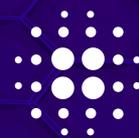

LED Exposure Technology

The Xpro S-E LED is a stand-alone exposure unit with advanced LED technology. It delivers faster exposure times compared to led scanning systems, superior uniformity compared to lamp units, and adjustable UV output for each plate types. With up to 30.000 hour LED lifetime, it ensures long-lasting, reliable performance.

KEY FEATURES:

- **LED Matrix Technology:** this configuration enables simultaneous exposure of the entire plate, achieving significantly faster exposure times: 30% faster than fluorescent lamps **and up to three times faster compared to any scanning LED system** currently available on the market.
- **Adjustable LED Power:** LED intensity can be adjusted through the unit's interface to achieve round or flat dots, with the **capability to produce flat dots even on standard plates.**
